Your tasks:

- You will be part of our **agile platform engineering team**, consisting of Scrum Master, Product Owner and 4 DevOps.

What you bring along:

- You are well-versed in the use of **cloud services, Kubernetes**, IaC (**Terraform**), **CI**, and **automation**.

- You will take over the **further development** of our self-developed **shop platform infrastructure** with focus on scaling and stability.
- You share responsibility for our systems and processes in live operations by **monitoring SLAs, response times, latencies** and **resource usage**.
- Just like your team members, you always want to **stay up-to-date** and therefore keep yourself informed about current trends.
- You have a 24/7 **on-call duty** (approx. 1x per month) in rotation with the other DevOps.
- You have extensive experience with distributed, modern architectures (**microservices**), **monitoring** (e.g., Prometheus / Google Cloud Operations Suite), **GitOps** (Flux), and **tracing** (OpenTelemetry).
- You have in-depth **Linux** knowledge and experience **operating web applications**.
- You have fundamental **software development skills** (especially Java, Node.js, Go, Next.js, GraphQL) and ideally have already gained experience with **Istio** and **traefik**.
- You enjoy taking on **responsibility**, demonstrate **ownership** of the infrastructure of our Commerce Suite, **communicate** clearly and understandably with your colleagues, and act as an **enabler** for other teams.
- You speak **German** and **English** at least at a B2 level.
- You have a certain penchant for **sarcasm**, but are still professional when it matters.
- You currently **live in Germany**.
