Drupal PHP Developer (m/f/d) – Cloud & DevOps – remote

START DATE

As of now

LOCATION

Bamberg

CONTRACT TYPE

Full-time employee

LEVEL

Professional/Experienced

[Apply now](#)

Your tasks:

- As part of our **Inspire** team, you will contribute to a **modern, scalable headless CMS** solution based on **Drupal**.

What you bring along:

- You have in-depth experience with **Drupal 10/11, PHP**, and **Symfony**.

- You will be responsible for **developing and customizing modules** and integrating external systems via **APIs**.
- You will manage **content types, paragraphs, taxonomy**, roles/permissions, and localization.
- You will take care of **operations** and **deployments** in Docker and Kubernetes environments.
- You will work on setting up **CI/CD pipelines** in GitLab and **automating** deployments.
- You will ensure **performance optimization** and **monitoring**, working closely with frontend and DevOps colleagues.
- You are confident in using **Composer, Drush, DDEV, and Docker**.
- You have knowledge of **JSON:API/GraphQL**, Infrastructure-as-Code (**Terraform**), and **Google Cloud Platform**.
- You have experience with **containerization, Kubernetes, CI/CD**, and **deployment** strategies (rolling updates, blue-green).
- You are a **team player** with an **agile** approach to work, **documentation** skills, and clear **communication**.
- You are willing to take on **24/7 on-call duty** (approx. once a month) with the other developers in the team.
- You can communicate well with your colleagues (**German** B2 level, **English** B1).
- You **currently** live in **Germany**.
